HARSHAVARDHINI

Aspiring Software Engineer | Java | Full Stack | Cloud

9976790967 harshadevaraj1205@gmail.com linkedin github

PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong foundation in Data Structures, Algorithms, Java, OOP, and problem solving. Experienced in developing full-stack applications using React, Spring Boot, REST APIs, and MySQL, with hands-on exposure to Machine Learning, Generative AI, and AWS Cloud. Strong debugging and analytical skills with industry internship experience and a keen interest in software development, AI, data, and cloud technologies.

EDUCATION

SSLC Srinivasa Vidhyalaya Matriculation Higher Secondary School | 2021 | Percentage: 100%
HSC Srinivasa Vidhyalaya Matriculation Higher Secondary School | 2023
Percentage: 91.83%
B.E. Computer Science and Engineering Sri Krishna College of Technology| 2023—2027 |
CGPA: 8.2

SKILLS

- Languages: Java, C++, Python
- Data & Analytics: SQL, MySQL, Data Analysis, Machine Learning
- Core Subjects: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Architecture, DBMS, Computer Networks
- Web: HTML, CSS, JavaScript, React
- Backend: Spring Boot, REST APIs
- Cloud: AWS, Virtualization
- Tools: Git, GitHub

CERTIFICATIONS & COURSES

1.AWS Cloud Practitioner Essentials. 2.Cisco Certified Network Associate (CCNA)
3.Data Analyst with ML Essentials – Honors

EXPERIENCE

- Web Development Intern | Evergreen Business Solutions

Developed a web application using React, Java, and Spring Boot.Integrated frontend and backend components

- Machine Learning & Generative Al Intern — InnoBoon Technologies

Worked on Machine Learning fundamentals and Generative Al concepts including LLMs and RAG.

- IT Intern — Titan Company Ltd., Hosur

Supported IT operations and assisted in troubleshooting system and software issues.

PROJECTS

- HeavyGuard – Heavy Metal Pollution Risk Analysis(Java, Spring Boot, React, MySQL, OCR, NER)

Developed an application to upload laboratory reports and extract heavy-metal values using OCR and NER.

- Fitness Tracker Application (Java, Spring Boot, React, MySQL)

Developed a full-stack fitness tracking application,Implemented REST APIs for frontend-backend communication.

- Al Image Detector (Deep Learning)

Built an Al model to classify real vs fake images using deep learning, trained on datasets and evaluated performance.

- Al Story Plot Generator (Gen Al + RAG)

Developed a Generative Al application using LLMs and RAG to generate story plots based on user input.

POSITIONS OF RESPONSIBILITY

- Executive Member — CSE B (Ill Year) -Coordinated class activities and supported communication between students and faculty.
- Served as Community Service Director of Rotract Club of SKCT(2025-2026)

PUBLICATIONS

• Published a research paper on Machine Learning based predictive Maintenance in IJRASET (June 2025)
DOI: 10.22214/ijraset.2025.72786
